Forty-Fifth Annual Report
The Sharon Sanatorium
1935

WILLIAM T. SEDGWICK, Sc.D.

President, 1901-1921

For many years he was the steadfast friend and counsellor of the Sanatorium. To him the Directors owed much of the success which the Sanatorium attained, and to them his loss was irreparable. His strength of character, his never-failing courtesy, his calmness and wise judgments, endeared him to all.

MEDICAL DIRECTOR'S REPORT FOR 1935

The year's work at the Sanatorium has been of considerable worth and there has been a greater demand for beds than in the year 1934. Some of the patients admitted have had but a short residence, since they were with us only while waiting for vacancies at one of the county sanatoria. Nevertheless, this short residence has been of great community value, for in each instance active cases have been taken from environments that were decidedly poor. Furthermore, immediate care was of paramount importance, since there were usually children in the homes who were in danger of becoming infected. In addition to these patients who were sent by local boards of health there have been more referred to us by private physicians this year than in the previous twelve months. The Sanatorium, therefore, still fills a need.

In certain cases, as in other years, residence has been shortened because of lack of funds. It is hoped that economic conditions may so improve that fewer will feel that they must go for this reason. It would be of great help to have a sufficient endowment to enable all needy cases to stay under treatment for the optimal length of time; that is, until there is no probable danger of a breakdown after a return to civil life. Furthermore, it is probable that *if there were no money worries* more incipient cases would seek admission. It is a sign of progress that those with advanced disease can often be brought back to useful living. Nevertheless, *the desideratum is to have patients come when the disease is strictly minimal*. Then, possibility of cure is greatest. Then, there would be rare need of the newer treatments — the collapse therapy as carried out by artificial pneumothorax or the more radical surgical pro-

cedures. It is almost trite to say that all advanced cases were at one time incipient cases, and that, further, *incipient cases properly treated rarely become advanced cases*. It should be the aim, therefore, to induce patients with beginning disease to start treatment. Economic, social and human welfare reasons all prove that early treatment of early disease pays largest dividends.

A start in a possible campaign to stress again to the medical profession the importance of recognition of beginning pulmonary tuberculosis was made at the Sanatorium this fall when the Clinical Club met there and discussed early diagnosis. Later the Norfolk District of the Massachusetts Medical Society held its fall meeting at the Sanatorium at which time there were papers read by Dr. Edward D. Churchill on "Bronchiectasis" and by the Medical Director on "Diagnosis of Incipient Phthisis". By these meetings some eighty or ninety local members of the medical profession have had their thought directed to *early recognition* of tuberculosis.

The general care of the institution has been as in previous years. There has been no new construction and there have been no extensive repairs. Many of the rooms have been freshly painted in lighter colors and look more inviting and cheerful. The buildings and grounds are in good condition. The new landscape plantings made by Miss Isabel DeCourcy Porter have made satisfactory growth. The farm has not yielded so well as in some years because of the dry weather. Nevertheless, the harvest has been fairly satisfactory.

Dr. Edwin A. Locke's new work at Williamstown has made it impossible for him to continue his regular visits to the Sanatorium. The loss of his counsel and medical skill is keenly felt. Dr. Cleaveland Floyd was good enough to give of his time to share responsibility of the care of certain cases with your Medical Director until the new Consulting Staff was organized.

It is always a pleasure to know that those who have been patients have kindly thoughts of the Sanatorium. A recent graduate writes to one of our nurses, "I miss Sharon and the friends I made there. I wish to thank you so much for all you did for me. I felt so badly when I left I just couldn't thank you, but I certainly appreciate all you did". And another former patient who went to another sanatorium writes, "I miss you dreadfully tonight. No back rubs for me. I am not sick enough, they say!"

The Children's Pavilion also comes in for favorable comment. One mother said, "I think it is a wonderful place and I realize I could never have given my boy the care he has there received". And again she said, "I went all around to investigate places and I could not bring myself to let him go to any of them. But when I saw the Pavilion at Sharon I decided to allow him to stay all summer — and now I want him to stay all winter".

MEDICAL STATISTICS FOR 1935

Full capacity of Sanatorium (including Children's Pavilion)	50
Number of patients admitted since December, 1934.	49
Number of patients discharged during the year.	50

Of those discharged during the year one adult had bronchitis and four stayed less than one month. This leaves thirty cases of adult tuberculosis and fifteen children to be considered in this report. Of the thirty cases of adult tuberculosis there were during the year:

Arrested	3 — 10%
Quiescent	9 — 30%
Improved	13 — 43%
Not improved	2 — 7%
Died	3 — 10%
	<hr/> 30
The number of patients who had tubercle bacilli in sputa was	22
The number of patients in whom the physical and X-ray signs were deemed sufficient for diagnosis was	8
The number of patients who had hemoptysis before entrance or during stay was	12

MEDICAL STATISTICS FOR 1935

(Continued)

Average stay of all cases	9 months
Longest stay of any case	41 months
Shortest stay of any case	1 month
Average gain in weight of all cases	7.9 pounds
Number of cases who lost weight	10
Average age of all cases	32.5 years
Number of hospital days	13,320
Number of hospital days patients were confined to bed	6,979
Number of meals served in bed	20,839
Number of artificial pneumothorax treatments	382
Number of operations on phrenic nerve	2
Number of thoracoplastic operations	2

The occupations of the patients before coming to the Sanatorium were as follows: clerical work, 2; secretary, 1; stenographer, 1; nurse, 1; school teachers, 4; bookkeepers, 2; artist and author, 1; singer, 1; home makers, 13; saleswoman, 1; maid, 1; living at home, 2.

Of the fifteen children discharged during the year six had the childhood type of tuberculosis, one had bronchitis and had also been in contact with an open case of tuberculosis, and the rest had debilitated states with underweight and anemic conditions, and of these six had been in contact with open cases of tuberculosis.

The average age of the children was 9.5 years. The average gain in weight was 11 pounds. The greatest gain was 59 pounds. The average stay was 12 months and the longest stay was 76 months.

No cases are admitted to the children's department that show any signs of open tuberculosis, hence there is no danger of the spread of the disease among the children. Furthermore, the Pavilion is so far removed from the main Sanatorium, where the adult cases are housed, that there is no possibility of one department interfering in any way with the other.

WALTER A. GRIFFIN, *Medical Director*

DOES SANATORIUM TREATMENT PAY?

The question is sometimes raised, "Does sanatorium treatment pay"? Naturally, not all patients who have taken it get well or stay well but there are countless cases who carry on their life work for years after discharge without breakdown, continuing the rules of living learned while at Sharon. These, certainly, strengthen belief in the Sanatorium's regime. It might be interesting to cite three such cases among those who have come to us. These are typical of many others who since their discharge have lived normal lives, and in several instances have assumed the responsibility of marriage and homekeeping.

AFTER THIRTY-FIVE YEARS

One frail little lady came to us in 1901 with a great deal of trouble in the lungs; so much so, in fact, that the outlook appeared almost hopeless. She had high fever and a loss of twenty pounds in weight. This case was treated by "expectant" methods. Improvement was gradual but steady and she is now comparatively well at seventy years of age. The important point is that during the thirty-five years since she was discharged she has taken full care of her household, consisting of her husband and daughter, has helped her husband in many ways in his work and has seen her daughter grow up, graduate from college, an apparently healthy young woman. She speaks to this day in glowing terms of the Sanatorium and feels that she owes her life to it, and probably the life of her daughter as well, because of the rules of hygiene that she learned while she was a patient.

TREATING THE DISEASE SURGICALLY

Some twenty years ago it became possible to do more for patients by treating the disease surgically. In 1924 a young woman of twenty-nine entered with a condition of

IN THE WOODLANDS OF SHARON

DOES SANATORIUM TREATMENT PAY ?

(Continued)

advanced disease in one lung, tired looking, anemic, thin, with high fever, and in every way presenting a hopeless aspect. Active surgical collapse was started a month after her entrance and continued for the twenty-one months that she stayed with us and for a time, even, after her discharge. The amount of work that this young woman has done in the last ten years is surprising — much more than many a well person with the expectation of health could have done. When she left us she wrote the following letter to Dr. Bowditch, who was then living:

“In departing from Sharon Sanatorium I feel that I owe you a little note of thanks and appreciation. It is with a brighter, healthier and happier aspect I am leaving today than when I entered twenty-one months ago. I am sincerely grateful to you, Dr. Bowditch, for having made possible such a cheerful, pleasant sanatorium at such a reasonable charge; to Dr. Griffin for his kindly interest and care; and to Mrs. Bishop and others connected with the institution. I hope the good work of Sharon Sanatorium will go on indefinitely.”

Another patient first came to us in 1926 and did very well here and for six years subsequently, but she had a severe infection four years ago that increased her lung trouble to a dangerous degree. At first her condition seemed serious; she had lost thirty-five pounds, had a constant cough and was swiftly going downhill. Here, again, compression of the sick lung proved of inestimable value and it was most joyful to see her rapid return to apparent health. For over a year she stayed with us and when she left she was able to follow a normal life. Last year she was married, and cares for her own home, ever grateful to the Sanatorium for her final return to health.

THE CHILDREN'S PAVILION

Our beautiful Pavilion, erected and entirely paid for through the generosity of Sharon's friends, has, since 1891,

offered to young, delicate children an opportunity under medical supervision and happy surroundings to gain robust health. It has especial appeal. Here there is no sickness, except such minor ailments as occur in ordinary family life. Rather, it is a haven, or at other times a place for convalescence or, again, a school for correction of faulty ways of living.

A SMILING HAPPY FACE

Jane had an indulgent mother. Although she did not mean to let her little girl run down in health, nevertheless, in consequence of her indulgence, a chronic disease was beginning to weaken Jane's constitution. A few months at the Children's Pavilion quite corrected the poor appetite. There was a gain of twenty-five pounds in weight, relief from difficult breathing that seemed like asthma, and in place of the petulant expression that was at first present there was a smiling, happy face.

JUST THE RIGHT PLACE

A distracted father, after the death of his wife, was faced with the problem of properly caring for his three little children. The mother had been long sick at home with tuberculosis. In her feeble condition she was unable to give them the attention that they should have received. They were undersized and anemic, in the condition to contract the dread disease. The Pavilion proved just the right place for them and the bewildered father was glad indeed to have them stay for a considerable period of time until they were well out of danger, had gained many pounds in weight and were the picture of health. That was several years ago. They have stayed well, are finely proportioned and even athletic.

TREASURER'S REPORT

FOR THE YEAR ENDED NOVEMBER 30, 1935

Notwithstanding careful planning we have for the three past years suffered from serious deficits mainly occasioned by the need of giving an unusual amount of free or partially free treatment.

Only a few patients in the special group that Sharon seeks to serve, young women of refinement and limited means, have the funds to draw upon to assure treatment as long as may be necessary. In some cases, it seems imperative to have the patient remain longer. Tuberculosis is a disease that usually requires many months of Sanatorium care, in some instances a year or more. At present we have but two free bed funds. The income from the \$20,000 Louis Agassiz Shaw Memorial Fund provides for about a year's occupancy and that from the \$5,000 Betsey T. Savage Fund covers about three months.

Gifts received from The Committee of the Permanent Charity Fund, Charles A. Dean Welfare Trust, Mary Dexter Fund, Keith Fund, Lundell Charitable Trust, Mason Fund and the Charles Irwin Travelli Fund, as well as the gifts from our loyal contributors, are all gratefully acknowledged. Additional funds are needed.

The Press throughout New England has our thanks for all courtesies shown.

"— WHERE OUR GIRLS GET WELL "

PERPETUATING ONE'S INFLUENCE

Some philanthropic institutions receive what might be called monumental gifts. Sharon's buildings and invested funds, with one exception, have been built up over a period of forty-five years by gifts and legacies from its regular contributors in sums under thirty thousand dollars. Most persons whose feelings are sensitive to the needs of others must limit the number and amount of their gifts while living. Sharon has had many such contributors. Yet, while those limitations were operative in life, there was gradually developing a purpose to remember Sharon in their wills. A number of legacies have resulted. We hope that more of the friends of this benevolent work will perpetuate their influence or that of some loved one in this way.

The consistent policy of the Board of Directors during all of these years has been not to unduly expand but to concentrate attention on the medical care of the patients and the cheeriness of their surroundings. We receive many evidences of the appreciation of patients, their friends, and our contributors that this is the right policy.

PERPETUATING ONE'S INFLUENCE

How important it is that Sharon's friends, who have for many years so devotedly supported it, should remember it in their wills, because it is very necessary that the Sanatorium should have a larger endowment to permit lower rates in both departments.

Among those who bequeath sums to hospitals, sanatoria and other philanthropic institutions there seems to be an increasing tendency to give unrestricted legacies; or to limit the period when only the income can be used to a term of years, following which the judgment of the Trustees shall govern. If no provision for the Sharon Sanatorium has been made in your will and you would like to make one, may we suggest that only a simple legal form is required, a codicil, which your lawyer can readily prepare.

FORM OF BEQUEST

I give, devise, and bequeath unto the Sharon Sanatorium in Sharon, in the Commonwealth of Massachusetts, its successors and assigns, the sum of

..... Dollars.

LIST OF SPONSORS

These 291 contributors living in 90 New England towns have cordially consented to our use of their names, "*as heartily approving the work of The Sharon Sanatorium*".

Commonwealth of Massachusetts

BE IT KNOWN that whereas Alfred Bowditch, Nathaniel H. Stone, Alice M. Curtis, Olivia Y. Bowditch, Mary H. Denny, Vincent Y. Bowditch, Robert W. Lovett, L. Vernon Briggs and Reginald Gray have associated themselves with the intention of forming a corporation under the name of THE SHARON SANITARIUM, for the purpose of establishing and maintaining a hospital for the treatment of persons afflicted with incipient pulmonary disease, and have complied with the provisions of the Statutes of this Commonwealth in such case made and provided, as appears from the certificate of the President, Treasurer, and Directors of said corporation, duly approved by the Commissioner of Corporations, and recorded in this office:

Now, THEREFORE, I, WILLIAM M. OLIN, Secretary of the Commonwealth of Massachusetts, do hereby certify that said Alfred Bowditch, Nathaniel H. Stone, Alice M. Curtis, Olivia Y. Bowditch, Mary H. Denny, Vincent Y. Bowditch, Robert Lovett, L. Vernon Briggs and Reginald Gray, their associates and successors, are legally organized and established as and are hereby made an existing corporation under the name of

THE SHARON SANITARIUM

with the powers, rights and privileges, and subject to the limitations, duties and restrictions which by law appertain thereto.

WITNESS my official signature hereunto subscribed, and the seal of the Commonwealth of Massachusetts hereunto affixed, this twenty-seventh day of March, in the year of our Lord one thousand eight hundred and ninety-one.

(Signed) WILLIAM M. OLIN,
Secretary of the Commonwealth.

[SEAL]

Commonwealth of Massachusetts

BE IT KNOWN that whereas THE SHARON SANITARIUM, a corporation organized under the laws of this Commonwealth, and subject to the provisions of chapter one hundred and twenty-five of the Revised Laws, has complied with the provisions of chapter one hundred and nine of the Revised Laws, as appears from the certified copy of the order of the Commissioner of Corporations, authorizing said corporation to change its name and adopt the name of THE SHARON SANATORIUM and the certificate of the President, Treasurer, and Directors of said corporation, duly filed in this office pursuant to the provisions of section ten of the aforesaid chapter one hundred and nine of the Revised Laws:

Now, THEREFORE, I, WILLIAM M. OLIN, Secretary of the Commonwealth of Massachusetts, do hereby certify that the name which said corporation shall bear is

THE SHARON SANATORIUM

which shall hereafter be its legal name.

WITNESS my official signature hereunto subscribed, and the Great Seal of the Commonwealth of Massachusetts hereunto affixed, this seventeenth day of May in the year of our Lord one thousand nine hundred and four.

(Signed) WILLIAM M. OLIN,
Secretary of the Commonwealth.

[SEAL]

March 16, 1922.

Attest:

HARRY L. PILKINGTON, *Notary Public.*

My commission expires July 23, 1926.

BY-LAWS OF THE SHARON SANATORIUM

ARTICLE I

The Corporation shall be composed of those persons signing the articles of association and of such persons as they or their successors shall elect to be members.

ARTICLE II

The annual meeting of the Corporation shall be held on the second Wednesday of December in each year at such time and place in the city of Boston as the President, or in default of appointment by him the Secretary may appoint, and notice of the said meeting shall be sent to the members at least seven days before the meeting.

Special meetings of the Corporation shall be called by the President or Secretary by three days' notice in writing.

Five members shall constitute a quorum at all meetings of the Corporation.

ARTICLE III

The officers of the Corporation shall be a President, Secretary, Treasurer, and not less than four nor more than eight directors at large, who shall serve for one year and until others shall be elected in their stead. The said officers shall constitute a Board of Directors, and shall have full power and authority to manage the affairs of the Corporation subject to such regulations and restrictions as the members at meetings of the Corporation may from time to time establish.

ARTICLE IV

The Board of Directors shall have power to take any measures which they may deem expedient for encouraging subscriptions, donations, and bequests to the Corporation; to enter into and bind the Corporation by such compacts and engagements as they may deem advantageous; to appoint from time to time such agents or committees as they shall think proper to attend to the practical details of the working of the hospital or to oversee and superintend the same; to appoint or engage the physicians, surgeons, matrons, attendants, and servants employed in the hospital and define their duties; and this power they may delegate to any of the committees above referred to, if they shall see fit so to do.

The Board of Directors may fill all vacancies in the Board up to the limit in numbers authorized by these By-Laws.

Three members shall constitute a quorum at all meetings of the Directors.

There shall be meetings of the Directors quarterly, on the second Wednesday of March, June, September, and December. Special meetings of the Directors shall be called by the Secretary.

ARTICLE V

The President shall preside at all meetings of the Corporation and Directors. In his absence a President *pro tempore* shall be chosen.

ARTICLE VI

The Treasurer shall receive and have the custody of all moneys, deeds, and securities of the Corporation, which he shall keep and manage under the control of the Board of Directors or any committee of the Board. He shall pay no moneys but by order of the Board of Directors or their committees.

ARTICLE VII

The Secretary shall attend all meetings of the Corporation and Directors and keep a record of the proceedings of each meeting in a book kept for that purpose; she shall give notice of all meetings of the Corporation, as is provided in Article II, and of all meetings of the Directors.

ARTICLE VIII

The property of this Corporation shall not be alienated nor shall any real estate be purchased except with the consent of a majority of all the Directors.

ARTICLE IX

These By-Laws may be altered or amended at any meeting of the Corporation by a vote of two-thirds of the members present at such meeting.

Attest: HARRY L. PILKINGTON, *Notary Public*.

GENERAL STATEMENT

The Sanatorium

Established and incorporated in 1891.

Object: To supply a suitable institution for the treatment of incipient pulmonary disease arising in women of refinement and limited means.

Capacity: 30 patients.

Location: In the pines at Sharon about five minutes from the station of the N. Y., N. H. & H. R.R. Sharon is about equally distant from Boston and Providence — 19 miles from Boston.

Terms: The price of board and medical care is \$20.00 a week, exclusive of laundry.

The Grounds: The Sanatorium grounds cover 120 acres — the elevation and outlook are most desirable. Pure air is abundant.

Food: No pains nor expense are spared to provide the patients with the most nourishing diet.

The Children's Pavilion and Open Air Boarding School

Established in 1918 through the generosity of friends.

Object: To extend to delicate children, predisposed to tuberculosis, a chance to regain normal health. No active cases are received.

Capacity: 20 children between the ages of 6 and 14 years.

Location: On the edge of the woods at some distance from the main buildings of the Sanatorium, a really ideal site.

Terms: \$15 a week, exclusive of laundry. This includes board and medical care other than dental and surgical treatment.

Studies: These are made as flexible as possible. Every advantage is given the individual. Classes and grades, however, are planned according to the standard of the best public schools, with a view to the pupil's keeping up with his grade.

Sessions: The morning session is devoted to upper grade work and the afternoon session to the lower grade.

Leisure Time: Handicraft work, with merry games and outings, are under the oversight of a well-qualified teacher.

Rest Periods and Meals: These are ample and are carefully attended to by a trained nurse and a dietitian, with the advice of the doctor.

VISITING HOURS

The visiting hours of either department are from 3 to 5 p. m. daily.

Important

The charges made to patients of the Sanatorium or the Children's Pavilion do not cover the expense of maintenance.

While this is not a commercial enterprise, neither is it a charity in the usual sense, but, like the privileges of our colleges, these are benefits which self-respecting families may accept.

Application for admission should be made to Medical Director, Dr. Walter A. Griffin, at the Sanatorium, or 311 Beacon Street, Boston, Massachusetts.
